2006 FIRST QUARTER SUMMARY

MURDER:

- ◆ There were two homicides in the first quarter of 2006 in Cambridge.
- ◆ The first homicide occurred on March 18th on Hamilton St. around 11 p.m. The victim was a Cambridge resident who was fatally wounded during a drive-by shooting.
- ◆ Ten days later, on March 28th, the second homicide occurred at one in the morning. The victim, a Somerville resident, was shot outside the *Phoenix Landing* on Massachusetts Ave. A large group of witnesses observed the shooting and were able to give a description of the suspect and point out his direction of flight. Police were able to locate and arrest the suspected shooter not long after the incident occurred.
- ◆ The most recent homicide conviction was that of Kevin Robinson in September of 2005, for murder and arson. In August, two people died as a result of a fire set in their building by Robinson. Robinson, who was a previous tenant of the same building, allegedly had ongoing problems with the building's landlord.

RAPE:

- ◆ Two rapes were reported in the first quarter of 2006. Both were non-stranger incidents; one was an attempted rape by an acquaintance that occurred mid-March where the victim was able to fight back.
 - **Acquaintance Rapes** are non-domestic rapes committed by someone who knows the victim. They include rapes of co-workers, schoolmates, friends, and other acquaintances, including "date rapes."
 - **Blitz Rapes** are stranger rapes in which the rapist assaults the victim on the street with no prior contact. Generally, the suspect "comes out of nowhere."
 - **Contact Rapes** are stranger rapes in which the suspect contacts the victim and tries to gain their confidence before assaulting them. Contact rapists typically pick up their victims in bars, lure them into their cars or houses, or otherwise try to coerce the victim into a situation in which they can begin their assault.
 - **Domestic Rapes** involve rapes between spouses, romantic partners, and family members.

ROBBERY:

- ◆ Street robberies were down by 34% from the last year's first quarter. There were 15 commercial robberies this first quarter, also down 35% over last year.
- ◆ A habitual purse-snatcher was arrested in Harvard Square on January 10th after police stopped the suspect and the victim positively identified him as the man who grabbed her purse and ran with it.
- ◆ There was a notable street robbery pattern that developed in Area 4, which started at the end of February and continued into the beginning of March. In all six cases, there were multiple suspects threatening the victim with a gun and demanding his or her wallet. In most cases, victims are males walking alone late at night.

- ♦ The first quarter saw only three gas station robberies, down from seven in last year's first quarter.
- ♦ There were three robberies at one convenience store located on Massachusetts Ave. beginning in January and continuing into early February; there were two commercial robberies that targeted dry cleaning establishments on Saturdays in January and February.
- ♦ **See the Pattern Analysis section for more information on robbery trends.**

BURGLARY:

- ♦ *Commercial Burglary:*
- ♦ There was an 8% decrease in commercial burglaries in the first quarter, mostly attributed to the decline in professional commercial burglaries targeting safes that were prominent in 2005. Of the 36 incidents, three were attempts where entry was apparently not gained and four were likely inside jobs perpetrated by current or former employees.
- ♦ A Somerville resident was arrested in February after being identified as the suspect who broke into the *Maria Bonita* restaurant on Massachusetts Ave. earlier in the month.
- ♦ Throughout the three months, there was a sporadic trend of commercial breaks into convenience and drug stores where lottery tickets were removed from the premises. It is believed that the suspects were also involved with additional commercial breaks in Cambridge. **See the Commercial Burglary Pattern Analysis section for a review of this pattern.**
- ♦ *Residential Burglary:*
- ♦ Down by more than a half from last year's first quarter total, there were an exceptionally low total of residential burglaries this first quarter. Ten of the 60 residential burglaries were attempts, where entry into the victims' homes was not gained.
- ♦ The four neighborhoods that saw the largest decrease in residential burglaries from last year to this year were East Cambridge by 85%, Cambridgeport by 79%, Peabody by 71%, and Mid-Cambridge by 54%.
- ♦ This low average can be partially attributed to the interdiction of housebreaks before they occur with investigations conducted by the Criminal Investigations Unit combined with information received from the Crime Analysis Unit. Additionally, patrol officers were able to arrest significant known burglars, deterring several housebreaks.
- ♦ Laptops, cash, and jewelry were common targets of housebreaks in the first quarter.
- ♦ Two individuals were arrested in Somerville early April in connection with a series along the Cambridge/Somerville border. They are believed to be involved in over a dozen housebreaks along the border affecting both cities.
- ♦ **For more details on Residential Burglaries this past quarter please see the Pattern Analysis section.**

LARCENY:

- ♦ Larcenies have overall increased 13%; the bulk of this increase can be attributed to larcenies from motor vehicles, which is up 47% from last year to this year.
- ♦ The most significant larceny trend of the first three months has been the theft of GPS Navigation systems in cars. The larceny of these systems is a national trend. They are a popular target for theft because they are easy to take and resell, easy to conceal, and very

expensive. The State Police arrested an individual who admitted to over a dozen larcenies from motor vehicles in Cambridge. **For more details, see the Pattern Analysis section.**

AUTO THEFT:

- ♦ In the first three months, the auto theft total was 23% lower than last year's first quarter total. Of the 44 stolen cars, Inman/Harrington and North Cambridge together reported 40% of the auto thefts.
- ♦ Thirty nine percent of the stolen cars have been recovered to date. A majority of them were recovered locally in Cambridge.
- ♦ With such an exceptionally low total, no discernable patterns developed over the three months.

**5 Year Crime Comparison
January - March**

Highlights: First Three Months in Review

First quarter crime totals are at their lowest point in thirty years.

Overall, index crimes have declined by 3% compared to the first quarter of 2005. The most drastic decline has been in residential burglaries, which are down by 55%. The arrest of a couple of local burglars helped to lower these totals. Commercial burglaries have also quieted since last year, with an 8% decline. This is partially attributed to the cooling of the commercial burglary pattern targeting safes, which was hot in the first half of last year.

Violent crime is up 4%, fueled by an increase in aggravated assault incidents. A number of these incidents were either domestic in nature or perpetrated by juveniles fighting with each other or throwing stones or snowballs at people.

Both commercial and street robbery is down this quarter compared to the first quarter of 2005.

Property crime totals are down 4% compared to last year. However, larceny is up 13% overall, driven mainly by increases in larcenies from motor vehicles and larcenies from residences.

Highlights: First Three Months in Review

Overall, malicious destruction incidents decreased by five percent; however, smashed car windows and graffiti incidents each recorded a significant increase over last year. At least eight of the malicious destruction reports involved the use of a BB gun shattering car windows. Area 4 and Inman/Harrington represented 46% of the graffiti incidents. Tire slashings were sporadic and saw a decrease of over 50%.

Forgery involving credit and debit cards was down by 47%. In a majority of the cases, the victim was notified by their credit card company or bank that fraudulent charges were made. Some victims however, did not find out that their card was improperly used until they received their monthly statement in the mail.

An increase in Internet related cons were reported. Suspects using websites such as *ebay* or *craigslist* were able to scam victims by not producing items that were paid for. In two of the Internet-related incidents, the victim was told via email that they needed to update their bank information and in doing so, gave out their personal identification and credit card numbers. It is likely that the actual incidence of this crime is higher than the number of reports made to the police department, due to underreporting.

FIRST QUARTER 2006 PATTERN ANALYSIS AND POLICE RESPONSE STRATEGIES

COMMERCIAL BURGLARIES:

There was an 8% decrease in commercial burglaries in the first quarter, mostly attributed to the cooling of the professional commercial burglary pattern involving the theft of safes in commercial establishments which was active throughout 2005. This pattern was not evident in the first quarter of 2006. There was one commercial burglary in the first quarter that resembled the previous year's pattern where the suspects cut a hole in the wall of *Anna's Taqueria* on Somerville Ave. The suspects tried to pry open the safes, but were unsuccessful. The suspects in this commercial burglary were thought to be involved in additional burglaries that occurred in December of 2005 and in an attempted commercial break into a convenience store located on Massachusetts Ave. at the end of March 2006. Throughout the first quarter, there was a sporadic trend of commercial burglaries into convenience and drug stores where lottery tickets were stolen. It is believed that the same suspects involved with the commercial breaks mentioned previously, were also involved with the lottery tickets thefts.

A Somerville resident was arrested in February after being identified as the suspect who broke into the *Maria Bonita* restaurant on Massachusetts Ave. earlier in the month. Another arrest was made in connection with two incidents that occurred at *Oleana Restaurant* on Hampshire St. in late March and early on in the second quarter.

LARCENIES FROM BUILDINGS – CONSTRUCTION SITE THEFT:

Between mid-December and March, there were 18 thefts from construction sites, including both commercial and residential buildings, where expensive tools, appliances, and other equipment were stolen. Locations in East Cambridge, Peabody, and North Cambridge accounted for 13% of the larcenies and the rest were scattered throughout the City. This series was relatively quiet in February but picked up again toward the end of March.

LAPTOPS: A HOT TARGET

Laptops remained a very hot target in commercial and residential burglaries as well as larcenies from buildings. One specific location on Massachusetts Ave reported a burglary with multiple laptop thefts during one weekend at the end of February. Additionally there were 16 larcenies from buildings where laptops were targeted. Of the 16 locations, 11 were thefts from a company office where victims reported their laptops missing after leaving their offices unattended and their laptops out in the open. A majority of the buildings targeted were in East Cambridge.

STREET ROBBERY TRENDS:

There were 29 street robberies in the first quarter of the year, down 34% from the previous year's first quarter.

What started out as a possible pattern in Cambridgeport, turned out to be more of a hotspot, with unrelated robberies all occurring around Central Square. Starting back in Mid-December and going until Mid-January, five street robberies occurred in that area. In four of the incidents, the victim was a female and there were two suspects in three of the incidents. The suspect descriptions and their method of robbing the victim were different in each incident.

There were two noteworthy street robbery arrests in the first quarter. The first arrest was made in connection with a robbery that occurred in late December. The suspect was later identified as the perpetrator after being arrested on an assault and battery warrant. The second was of a habitual purse-snatcher who was arrested on January 10th in Harvard Square after police stopped the suspect and the victim positively identified him as the man who snatched her purse.

The most notable street robbery pattern involved six robberies in Area 4, which started at the end of February and continued into the beginning of March. The first four incidents occurred on either an early Tuesday morning or a late Tuesday night. The series continued until March 9th, where two robberies occurred within minutes of each other in the early hours of a Thursday morning. In all six cases, there was more than one young suspect threatening the victim (most cases a male, walking alone) with a gun and demanding their wallet. In four cases, the victim refused and the suspects fled without taking anything. This pattern has stopped and no related incidents have been reported since March 9th.

DECREASE IN COMMERCIAL ROBBERIES:

There were 15 commercial robberies this first quarter, down 35% from last year. There were two taxi driver robberies; the first was on Lawn St. in January, where two customers assaulted the driver and robbed him of his cell phone and cash. An arrest was later made in connection with this robbery. The second was a week later, while a cab was idling at the intersection of Alewife Brook Parkway and Rindge Ave. A group of 20 young teens surrounded the taxi, opened the passenger side door, and stole the driver's cell phone and wallet. A juvenile later admitted to the theft in this incident.

There were two notable commercial robbery series' this first quarter. The first series of the year targeted a convenience store on Massachusetts Ave where there were three robberies between January and early February. In each of the robberies the suspect entered the store, threatened the clerk with a gun and demanded money.

The second couple of incidents targeted dry cleaning establishments. There were two commercial robberies at cleaners on Saturdays in January and February. In both robberies, the suspect entered the cleaners wearing a black mask, brandished a handgun, and demanded money from the register. The suspect then fled in an awaiting motor vehicle operated by a second suspect.

LARCENIES FROM MOTOR VEHICLES – GPS AND CAR STEREO THEFTS:

There were 179 larcenies from motor vehicles in the first quarter of the year. Nearly 14% of the larcenies targeted GPS Navigation systems. A similarity in a majority of the incidents was the method of entry, usually by breaking windows. Nearly all the thefts took place in parking garages/lots. The most common time frame was during the day from 9:00 a.m. to 5:00 p.m. when most vehicle owners are at work away from their cars. There were over 10 incidents at the Galleria Mall and over 10 at Cambridge Center. Kendall Square and Science Park were also targeted. The State Police arrested a major suspect in these larcenies in early February. This offender admitted to stealing five GPS systems from the Museum of Science parking garage, five to six from the Galleria, 10-12 from Kendall Square, as well as from locations in Boston. Nationally as well as locally, this trend seems to be cooling.

Three juveniles were arrested on Fresh Pond Parkway at the end of January after witnesses reported seeing three suspects entering cars and removing items. When officers caught up with the

suspects, numerous items were found in their possession from a number of previous larcenies from motor vehicles.

A pattern that began at the end of the First Quarter and is continuing into the Second Quarter is theft of car stereos. Multiple incidents were clustered in Peabody and East Cambridge. Windows are being smashed to motor vehicles early in the week overnight. There have been a total of 20 larcenies targeting stereos throughout the City since March. More than half of the cars targeted have been Hondas. Thirty-five percent of the 20 thefts occurred in Peabody.

EXCEPTIONALLY LOW NUMBER OF RESIDENTIAL BURGLARIES:

There was an exceptionally low total of residential burglaries this first quarter, down by more than half from last year's first quarter total. The first quarter last year saw 132 residential burglaries; this year there were only 60. Further, when comparing these first quarter totals to the average of the previous eight years, it is still down by 40%. Ten of the 60 residential burglaries were attempts. Laptops, cash, and jewelry were the common targets.

Mid-Cambridge reported four residential burglaries one day in January, where entrance was gained by prying the front door in each residence. Two of the burglaries occurred in the same apartment complex and all four of the housebreaks were in residential complexes. In three of the housebreaks, nothing appeared missing from the residence, but the residences were rummaged through. The highest number of housebreaks was reported in Mid-Cambridge, which is one of the most densely populated neighborhoods in the City.

A cross-jurisdictional pattern emerged along the Cambridge/Somerville border, during the early days of the week and between noon and 3:00 p.m. Entry into residences was split between forcing front doors and prying side windows. The suspects were targeting electronic equipment, such as laptops and computer accessories. Two individuals were arrested in Somerville in early April in connection with this series. They are believed to be involved in over a dozen residential burglaries along the border.

CAMBRIDGE POLICE RESPONSE STRATEGIES

The Cambridge Police Department utilizes a number of different strategies and tactics to identify and interdict crime patterns and trends. *Problem Oriented Policing* is a technique that is employed to combat long-standing crime problems. With POP, the Department analyzes situations, responds employing an array of suitable strategies, and then assesses the outcome of these actions. The community is kept abreast of emerging hotspots in their neighborhoods through scheduled monthly meetings. In more serious cases, a crime alert is dispatched to the affected area.

If ongoing target crime patterns arise, various patrol responses are deployed. Some officers are used as decoys, surveillance units cover potential suspects, and patrol cruisers are directed to specific locations for deterrence and suppression of criminal activity. Regardless of the response strategy, the safety of all citizens remains paramount to the Cambridge Police Department.
